It is a great course that simplifies how we should think about a business (the start and the long term visions) it also reorders our way of thinking about how firms work and overcome their obstacles. The course is clear and can help me understand how to take a long-term view without compromising your existing moment/growth/plan. Excellent course that broadened my knowledge and skills on the nature of strategy, the strategic planning and implementation process and its evaluation. The extensive use of short video lectures, YouTube videos and reading material and literature is well distributed throughout the course, with clear examples.

Finally I am grateful to my strategic management professor - Kirill Savrassov

I want to talk about my learning experience over the past few months. First of all, I am grateful to BSU for giving me the opportunity to receive a Master's education, and let me realize my dream.

Throughout the course, I felt the education level of BSU. The teachers are very attentive. Their teaching level is excellent and their life experience is also very rich.

The Strategic Management course of teacher Kirill Savrassov let us know how to formulate strategy, how to execute strategy, how to conduct strategic analysis and make strategic decisions.

The Project Management course of teacher Yulia Nichkasova taught us how to manage the life cycle of a project through simulated projects.

Teacher Ekaterina Samuseva's Russian course gave us a taste of the charm of Russian and gave us the opportunity to learn our favourite Russian songs, such as "Katyusha".

There are other teachers who teach equally well.

The good times are always short...

It's a great honour to spend a year of Master's study life with dear teachers and lovely classmates in Belarusian State University. Our classmates help each other and get along well with each other. I like professor Yulia Sapozhnikava and professor Kirill Savrassov most. Julia is very beautiful and the knowledge she taught us in class is also very easy to understand. I like the Miro tool she used to discuss and communicate in class with us. We can communicate and express our own ideas, and the classroom atmosphere is very active. The learning task goals set by Mr. Kirill on the learning website are very clear, and also, we can apply the knowledge to our Master's thesis.

Курс действительно дал много практических навыков, которые можно использовать в будущем. После написания всех лабораторных работ и составления своего собственного первого бизнес-плана, чувствовалось, что все сделано не зря и знания действительно остались не только в теории. Поэтому могу сказать, что это один из лучших курсов за все 4 года обучения в университете. Спасибо!

Отдельно хочу отметить лекции, это был не просто действительно понятный и доступный материал, но и комментарии, которые вы давали из собственного опыта, которые только заостряли внимание на важности курса.
